

# Rediscover Type.

If you work in a creative, print or production environment then your tools-of-the-trade include Adobe® Illustrator®, Adobe® InDesign® or QuarkXPress®. But your toolkit isn't complete without Suitcase Fusion™ 2, a professional-grade font manager that works seamlessly with these design applications to ensure that you have the exact fonts your document requires and that every font in your collection is clean and ready to go.

If you are creating with type, Suitcase Fusion 2 equips you with an enhanced interface and new font preview capabilities that make it easy to explore, find and select the right font for the job.

*“Suitcase Fusion 2 has done a remarkable job in stability, speed and usability.”*

*James Dempsey, Macworld*

## Why You Need Suitcase Fusion 2

1. Rediscover your type – experiment, explore, create
2. Work with fonts easily and confidently in your design applications
3. Avoid potential font issues (missing fonts, corrupt fonts, font conflicts, etc.)
4. Eliminate duplicate font issues and unnecessary font conflicts
5. Protect your font collection – optimize, organize, secure

## Feature Highlights

### Font Auto-Activation

#### Unrivaled font matching

Suitcase Fusion 2 delivers fast, precise, face-level automatic font activation for critical design and publishing applications, including Adobe InDesign and Illustrator, and QuarkXPress. Auto-activation plug-ins utilize our patented Font Sense™ technology that works like font fingerprinting to identify and activate the exact fonts your document requires when you open it – even those in embedded or linked objects.

### Breathtaking Font Previews

#### See your type for what it is

Beautiful, dynamic previews allow you to compare your fonts side-by-side. Floating Previews give you the power to drag-and-drop preview text directly into a live document. The Glyph View lets you see all characters supported by a selected font. The Zoom Slider adjusts preview size on-the-fly.

### Sleek, Modern Interface

#### The perfect dashboard for your type

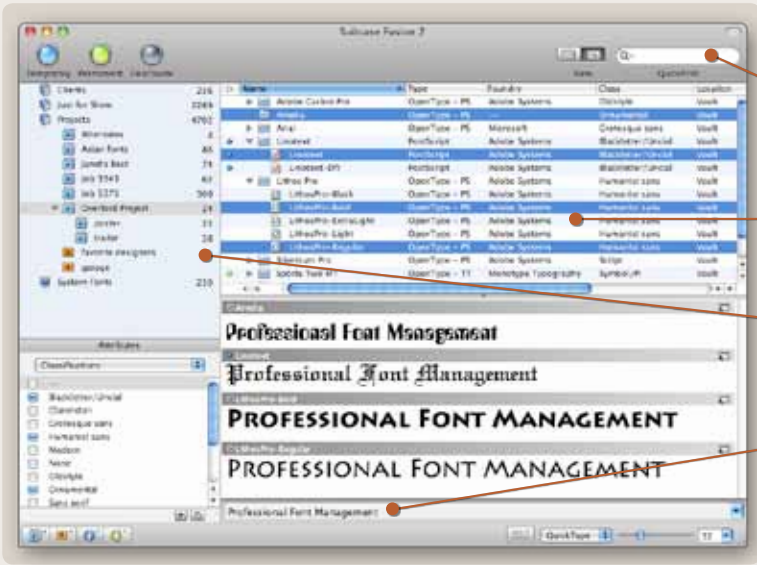

The all-new interface gives you the perfect excuse to mix a little play with your work. Its sleek, straightforward design and next-generation features makes it easy to find, experiment with, select and activate any typeface in your library.

### Font Doctor™ Utility

#### (Free with purchase)

Get the industry's leading font diagnosis and repair utility. Use it hand-in-hand with Suitcase Fusion 2 to ensure an optimized font collection and clean your font caches with ease.

Sleek, Modern Interface puts the fun back into working with type.

**Find the right font fast:** use the QuickFind box for fast, dynamic searches. Conduct robust, multi-level searches or use the Attributes Pane to search for groupings of fonts.

**Detailed font information:** in the Fonts pane, you can view and sort by detailed information as well as group by individual fonts or font families.

**Easy access and activation:** within the Libraries pane, you can create your own custom font sets for a specific client, project or event or create Smart Sets that act like iTunes® smart playlists.

**Dynamically preview any text:** simply enter any text you want into the QuickType box and preview it in real-time in multiple font faces.

Dynamic Previews allow you to quickly view, compare and experiment with type before activating. Create print sample pages of any previewed font.

**See preview text in live documents:** simply drag-and-drop text from the Preview Pane into any open document to see how it looks in action.

**Side-by-side comparisons:** view and compare selected fonts side-by-side in multiple formats including custom type.

**Adjust preview text size on-the-fly:** using the new Zoom Slider bar.
